

SPEEDFIX & ULTRASPEED Heald Frames

Available for any Rapier & Air-jet Weaving Machines

Features / Technical Information

- Heald frames made with bar profile staves 120 x 9.4 mm for SPEEDFIX and 140 x 9.4 mm for ULTRASPEED, for nominal weaving width 1700 mm up to 4600 mm and “easy to handle” intermediate supports as of width 2600 mm
- Stainless steel head rods suitable for flat steel healds with either J or C shaped end loops
- Distance between heald end loops 331 mm (13 inches) or 382 mm (15 inches)
- Sturdy corner connections between frame profile staves and lateral supports - handling highest loads and weaving machine speeds
- Highest reliability thanks to strict quality control of materials, components and manufacturing
- Easy use and low maintenance
- Suitable for use on all automatic drawing-in machines

Application table

Rapier weaving machines	Standard execution	Heavy duty application	Speed range
Dobby Terry	SPEEDFIX (120mm) SPEEDFIX (120mm)	ULTRASPEED (140mm) ULTRASPEED (140mm)	Up to 750 rpm Up to 600 rpm
Air-jet weaving machines			
Dobby Cam Motion		ULTRASPEED (140mm) ULTRASPEED (140mm)	Up to 1000 rpm Up to 1200 rpm

Why should ITEMA heald frames become your most convenient choice?

- **Versatility:** One stop purchasing from the original supplier of rapier and air jet weaving machine brands Sultex, Somet & Vamatex, or any other weaving machine brands. Ask for more detailed information
- **Competitiveness:** Most attractive “price – performance” ratio. Ask for an offer
- **Quality:** Manufacturing processes are controlled and guaranteed by ITEMA standards.
- **Service:** ITEMA worldwide service network is available. Ask for the organization available in your region

Long-lasting experience in the production of heald frames

- Thirty years of experience on field of heald frames are in our design quality; state of the art method and design-tools, joined with construction techniques which represent the best worldwide technology, guarantee the highest performance of ITEMA heald frames under hardest working conditions

ITEMA: Profitable fabric forming - your business in our minds!

ITEMA personifies the strength of Italian inventiveness and Swiss precision. Our production and assembly lines in Italy, Switzerland and China generate the successfully branded fabric forming solutions of Sultex, Somet & Vamatex. We market, service and maintain weaving machines, heald frames, accessories worldwide.

We are known for being the sole provider of the three leading weaving machine systems. Besides the Rapier and Air jet insertion principles, we are unique with the Projectile technology. The three brands coupled with the three insertion systems guarantee the right weaving machine for any fabric forming proposition.

We have been successful in our business for more than 150 years - our global machinery population extends to well over 200000 units. Our global presence in more than 90 countries ensures a fast and reliable attendance to your service needs.
